

Installation instructions EL500 and EL 650 electrical 2-legs

Package contains 2 telescopic pipes, 2 sidebrackets, 2 telescopic legs, 2 floor bars, screws, 1 controlbox, cables and control-switch panel.

Step 1

Assemble sidebrackets to the telescopic pipes. Insert the telescopic pipes, adjust to suitable length and fix it to the table top using self-tapping screws.

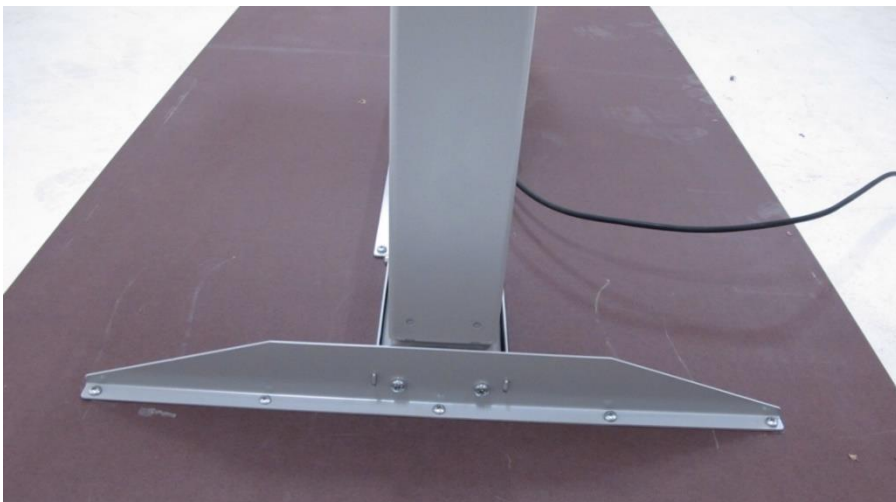

Step 2

Assemble floor bars to the telescopic legs with 4 machine screws each.

Assemble telescopic legs to the pipes and sidebrackets with 6 machine screws each.

Step 3

Fix the controlbox to a suitable place under the table top. 2 long screws.

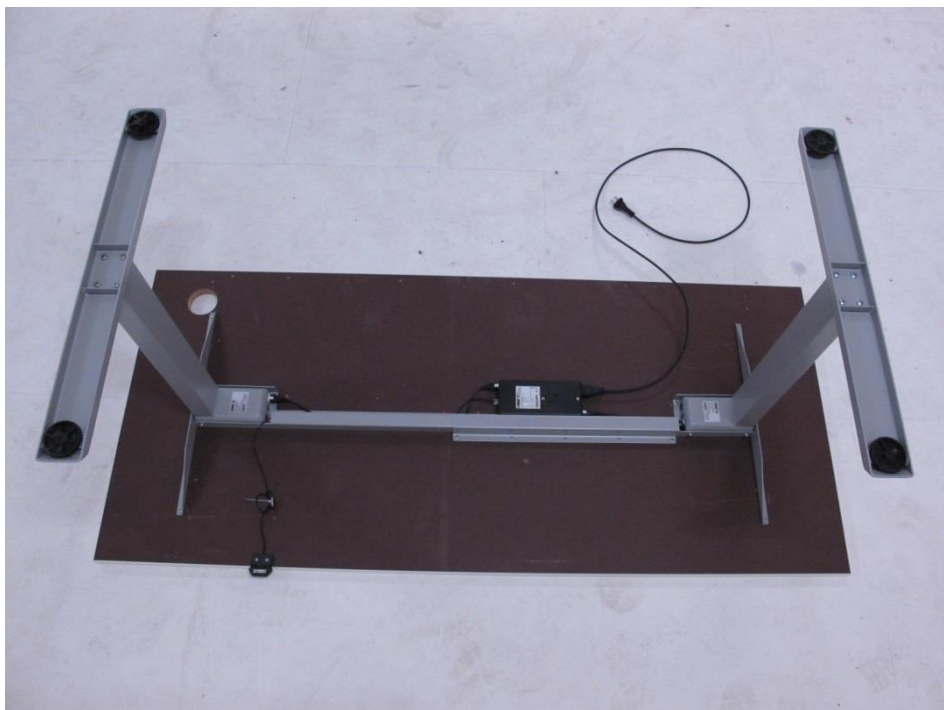

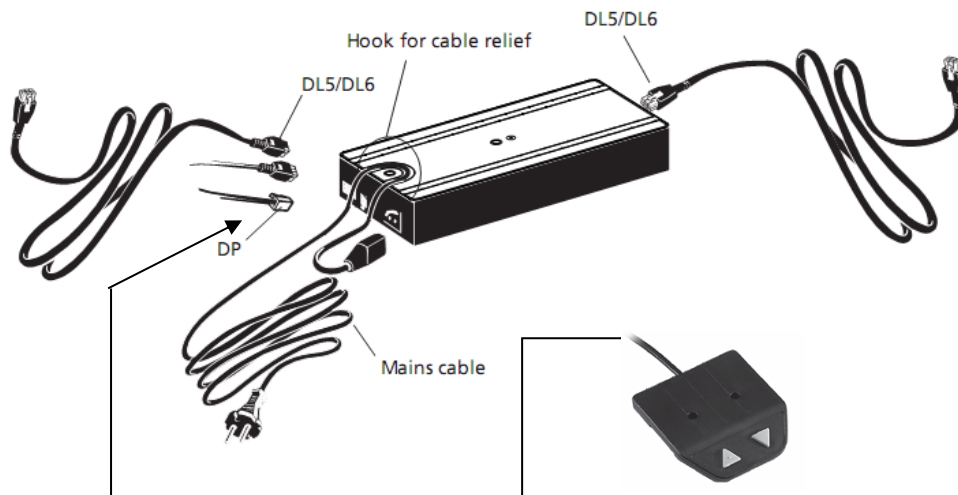

Connect the cable from the controlbox to each telescopic leg.

Affix the control-switch panel (2 small screws) at table top edge and connect cable from switch to control box.

Connect the power cable.

Press the down button and hold in 6-7 sec after bottom is reached to zero-set the table (the table will adjust 3-4mm up and down in this process).

Press the up button until the table top is in the desire height.

Ready to use.
